

Maximizing your grain tank capacity!

Improving the peak of the grain in your harvester tank will ultimately lead to more capacity. The Crary Top Off Auger will keep the grain moving up and away from your harvester's clean grain auger.

Harvesting in everyday challenging conditions such as wet corn, soybeans or wheat can put stress on your harvester's equipment. Eliminate that stress while reaching full hopper capacity with the Crary Top Off Auger.

Fits most major brands of harvesters.

- Durable heavy-gauge construction
- Powder coated paint for long-lasting durability
- Folds down quickly
- Can be shipped via UPS
- Easy installation

Folds quickly and easily below the height of your grain tank.
