

**You have questions,
we have answers!**

What is the application for the Debris Loader?

The Debris Loader is used for commercial or municipal pickup of leaves, grass, or other light debris.

How much reduction of debris will I get?

There is very limited reduction of the material due to the design for compaction vs. reduction. The Debris Loader is designed to effectively load leaves, grass, or other light debris from the ground to a vehicle collection bin.

Is there a rental application for this machine?

Yes. Commercial landscapers and yard care people will have a seasonal need for this piece of equipment.

How difficult is it to perform maintenance on the machine?

ECHO Bear Cat understands that proper maintenance is vital. We have designed the machine for ease of maintenance.

How can I get pricing information?

Your nearest dealer can provide you with product and price info. You can find your nearest dealer by accessing the dealer locator button at this link: www.bearcatproducts.com
